

Below is a basic list of the items and schooling. The list is not all encompassing, but it will get you started. **If we have not done so, please bring a Passport or a birth certificate and ID.** This is required for flight training. If you have any questions, email or message your flight instructor.

All the linked websites are suggestions

- Required Items for flight training:
 - [Student Pilot Certificate and Medical](#)
 - [Medical How To](#)
 - At least second Class if you want to get paid to Fly, third class if it is just for personal use.
 - Log Book
 - [ASA-SP-57](#)(More Blocks) or [ASA-SP-30](#)(Smaller and less blocks)
 - [Kneeboard \(with clipboard\)](#)
 - HeadSet
 - *** Not Required at first but if you continue you will need your own at some point. David Clark's, Bose, and Lightspeed are brands I know, but there are many out there.No matter which you get, read reviews, and we suggest getting noise canceling. We have had success with Bose or Lightspeed Zulu's, as they make the audio more clear and have noise canceling. You will need the U-174 Plug. Coiled cable is up to you. If you already have a headset for airplanes, you can buy an adapter, do not buy the cheapest one, they have been known to fail***
 - [David Clarks](#)
 - [Bose](#)
 - [LightSpeed](#)
 - [Other Brands](#)
 - [Plotter](#)
 - [E6B](#)
 - [Sectional](#)
 - At least Chicago and St.Louis is also good to have
 - [ForeFlight](#)
 - Widely accepted by Examiners, will replace all paper charts and can store aviation documents.You will have to have an apple device. If you have an Ipad Mini, this will work great on a kneeboard, but an iphone will also work. The basic package will be enough for VFR.
 - Our training will start on paper sectionals to ensure you have a good understanding of navigation via Pilotage and dead reckoning.
 - ***This isn't required and paper sectionals will suffice. It just gives additional situational awareness and consolidates all documents in one location. It can also be a backup for our paper logbook.***

- Reading/Study Material
 - All FAA Handbooks can be found online, but you will have to buy a physical copy, I recommend having a physical copy to highlight and bookmark
 - Helicopter Flying Handbook (HFH)
 - [Digital](#)
 - [Physical](#)
 - Pilots Handbook to Aeronautical Knowledge (PHAK)
 - [Digital](#)
 - [Physical](#)
 - FAR/AIM
 - [Digital](#)
 - [Physical](#)
 - Aeronautical Chart User's Guide
 - [Digital](#)
 - [Physical](#)
 - R22 Pilot's Operating Handbook (POH) *I recommend just having the Digital Copy on hand*
 - [Digital](#)
 - [Physical](#)
 - Robinson Maneuver Guide
 - [Digital](#)
- Websites I recommend for Aviation Products
 - [Sporty's](#)
 - Pilot Accessories
 - [Mypilotstore](#)
 - Pilot Accessories
 - [ASA](#)
 - TestPrep and handbooks
 - [Amazon](#)
 - I recommend doing research first, then going to Amazon if it happens to be cheaper
- Ground School
 - ***We cover all of the required topics in-person if you choose, but an online ground school is an option if you choose. We can then cover any topics you find confusing or just need more clarification on if you choose to purchase ground school elsewhere.***
 - [Helicopter Online Ground School](#)
 - [Kings](#)
- Youtube Channels and Videos
 - [Helicopter lessons in 10 minutes or less](#)
 - [Helicopter Training Videos](#)
 - [Michael Miller](#)
